Taśmy węglowe - taśmy pokryte węglem, działają na zasadzie odbicia (miejsce wykorzystane na taśmie nie może być użyte po raz drugi, ponieważ pozostaje puste). Taśmy węglowe mają zastosowanie w urządzeniach typu "lift-off".

Taśmy nylonowe - taśmy materiałowe nasączone tuszem. Mogą być użyte kilka razy (tuszu zużywa się stopniowo w trakcie użytkowania taśmy), wobec czego działają dłużej niż taśmy węglowe. Taśmy nylonowe mają zastosowanie w urządzeniach typu "covered-up".
